Weights and Rates* (Results vary depending on product density)

	Model A-1	Model A-2
1 oz to 16 oz	60 cpm	120 cpm
1 lb. to 2 lbs.	30 cpm	60 cpm
5 lbs.	12 cpm	24 cpm
10 lbs.	6 cpm	12 cpm

For specific speeds and accuracies on your product, we invite you to send samples for testing.

** Note: Speeds on the semi-automatic Model A are subject to operator skill.*

Options:

- Casters for portability
- Supply hopper vibrator
- Support frame to fit over bagger
- Container indexing conveyors
- Attachable spouts to suit containers
- Supply hopper cover with 6" flange
- Diving spout to provide a clean fill
- Vibrating table to settle product
- Unscrambler table
- Accumulator table

Accuracy is + or - 1 % (depending on product density).

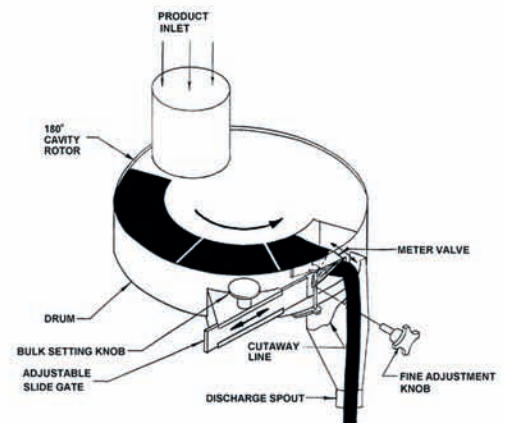

Model A-1

(Shown with optional unscrambler table and accumulator tables).

Fully Automatic Model

Product comes through the supply hopper inlet and fills a cavity in the rotor. As the rotor cycles the product is portioned out by the meter valve and streams into the container for gradual air displacement.
