Weigh, Package and Reduce Fines in the Bag!

The iQ-1E is an entry level scale and often used for weighing and filling popcorn, granola, candies and sugar cubes into bags, many of these products have unwanted fines that get into that bag along with the larger piece size products.

Weigh Right offers our iQ-1E scale that quickly and accurately weighs the product and has an optional vibratory tray that is perforated to help reduce the fines that end up in the bottom of the bag.

[See our new video of the iQ-1E.](#)

Shown Above: The iQ-1E scale with a perforated tray and collection tubs.

See our [new video](#) for more features.
