

Weighing In

A newsletter from Weigh Right

Bulk Filler for packaging moist, slightly sticky or IQF products.

Weigh Right offers our BDC-3601 belt feed scale designed to fill 5 lbs. to 50 lbs. of moist, slightly sticky or IQF products that are better handled using belts compared to vibratory feed. The BDC-3601 comes standard as a washdown model and offers dimpled textured stainless steel as an option. Other options include a hold-down bag clamp to support the bag during filling and an adjustable discharge hopper for different height cases.
