

Weighing In

A newsletter from Weigh Right

Packaging fresh-cut lettuce or diced / sliced vegetables with our FCS-1 scale

Weigh Right offers our FCS-1 belt feed scale designed to fill 1 lb. to 10 lbs. of fresh-cut lettuce or diced / sliced vegetables.

The FCS-1 comes standard as a washdown model and offers an infeed conveyor with a static loading hopper that can be easily removed for cleaning.

Weigh Right also offers an LBB (Live Bottom Bin) version of the loading hopper offering a second conveyor inside that receives a large load of product from a spin basket and feeds the product first-in-first-out to the main conveyor.

Other features include a bag clamp to support the bag during filling and a push-plate to ensure a clean discharge of the portioned product.

Weigh Right offers a single (FCS-1) or our double head (FCS-2) for faster rates. Both semi-automatic and fully automatic models available.

To learn more, see our new video of the FCS-1
